

**A GEOGRAPHICAL CATALOGUE OF PERSONS WHO HAVE STATED
THAT THEY ARE INTERESTED IN FISH CULTURE.****By CHAS. W. SMILEY.**

In the report of the United States Commissioner of Fish and Fisheries for 1872-'73 there was published an "Alphabetical List of American Fish-culturists and of persons known as being interested in Fish culture" (p. 558). That list, consisting of about 325 names, contained a fair representation of the fish-culturists of that day as known to the Commission. It was then stated that the list would be subsequently revised, but opportunity did not present itself for such revision until 1881. During that year and the succeeding year a circular was sent to each person whose name appeared in the old list and to each of the members of the American Fish-cultural Association. All were asked to furnish the names of other fish-culturists known to them. The latter were in turn addressed with the same circular, and the list which is now published has been elaborated in that way. Some 1,200 or 1,500 persons have been reported as interested in fish-culture who have not replied to these circulars; the following list, however, contains only the names of such as have been heard from direct.

Although it contains about 3,200 names, the list is by no means a complete one of the persons in the United States who are practically interested in fish-culture. All whose names are presented either have ponds or hatcheries, or have contributed to the literature of the subject, or have taken an actual interest in the stocking of public waters. The date affixed to each name denotes the year since which each correspondent, according to his own statement, has been interested in the subject. The letter P attached to the year indicates those who reported that they owned or leased ponds or lakes, and the letter H those who have in the past operated, or are now operating, hatcheries.

It is intended to supplement this list in the Bulletin for next year by printing the list of persons who, having carp ponds, have actually made application to the United States Fish Commission for carp. Only a few such persons are mentioned in the present list.

From the magnitude of this list and from the fact that it can easily be trebled may be seen something of the deep and widespread interest which has been awakened in fish-culture during the past decade.

Acknowledgment is hereby made of the kindness of all these persons in responding to the inquiries of the Commission. Many of them have given interesting information concerning the progress of fish-culture in their vicinities, which will in due time be collated and published. Acknowledgment is also made of the clerical assistance of Mr. E. H. Wilson, Mr. C. W. Scudder, and Mr. C. E. Latimer, each of whom has shown a commendable interest in securing for it the high degree of accuracy desired by the compiler.

Geographical catalogue of fish-culturists.
