

GENERAL INDEX.

	Page.		Page.
affinis, <i>Gambusia</i> , habits, morphology, and embryology.....	181-190	Michigan, Douglas Lake, fishes.....	219-249
<i>Anchovia mitchilli</i> , embryology and larval development.....	3-19	<i>mitchilli</i> , <i>Anchovia</i>	13
<i>Bairdiella chrysur</i> a, embryology and larval development.....	3-19	Morphology, reproductive organs, <i>Gambusia affinis</i>	181-190
<i>canis</i> , <i>Mustelus</i> , sense of smell.....	63-68	skeletal musculature, king salmon.....	25-59
<i>chrysur</i> a, <i>Bairdiella</i>	4	<i>Mustelus canis</i> , sense of smell.....	63-68
<i>Cynoscion regalis</i> , correlations of weight and body measurements.....	141-147	<i>Oncorhynchus tshawytscha</i>	25, 73, 153
Diseases in fishes:		Pacific salmon.....	74
Atrophied tissue.....	201	Parasites, Sporozoön.....	193-214
<i>Chloromyxum funduli</i>	205	Physiology, alimentary tract, king salmon.....	153-175
<i>Myxobolus musculi</i>	202	skeletal musculature, king salmon.....	25-59
Myxosporidian infection.....	202, 208	sense of smell, dogfish.....	63-68
<i>See also</i> Sporozoön parasites.		reproductive organs, <i>Gambusia affinis</i>	181-190
Dogfish, directive influence of sense of smell.....	63-68	Pond culture, Potamogetons.....	255-291
Douglas Lake, Mich., ecological study of fishes in mid-summer.....	219-249	Potamogetons, pond culture.....	255-291
communities.....	239	economic aspect of.....	281
fishes.....	222	propagation, natural and artificial.....	268
habitats.....	221	species investigated.....	260
species, relations to those of other waters.....	246	species, animals foraging on.....	284
Embryology, <i>Gambusia affinis</i>	181-190	<i>regalis</i> , <i>Cynoscion</i> , correlations of weight and body measurements.....	141-147
Embryology and larval development, <i>Bairdiella chrysur</i> a and <i>Anchovia mitchilli</i>	3-19	Salmon, king, fat-absorbing function of alimentary tract.....	153-175
Fishes, Douglas Lake, Mich.....	219-249	Columbia River.....	91
diseases. <i>See</i> Sporozoön parasites.		fat stored, resorption during fast of spawning migration.....	73-138
parasites.....	193-214	fat loading, beginning spawning migration.....	80
sense of smell, dogfish.....	63-68	skeletal musculature.....	25-59
viviparous, <i>Gambusia affinis</i>	181-190	sense of smell, dogfish, directive influence of.....	63-68
<i>Fundulus</i>	193	Skeletal musculature, king salmon.....	25-59
<i>Gambusia affinis</i> , habits, morphology, and embryology.....	181-190	Sporozoön parasites, vicinity Woods Hole, Mass.....	193-214
<i>heteroclitus</i> , <i>Fundulus</i>	193	<i>Chloromyxum funduli</i>	205
Killifish.....	193	<i>Myxobolus musculi</i>	202
King salmon, fat-absorbing function, alimentary tract.....	153-175	Myxosporidian infection.....	208
Columbia River.....	91	Protozoa.....	206
fat stored, resorption during fast of spawning migration.....	73-138	<i>Squeteague</i> , relations of weight and lengths.....	141-147
fat loading, beginning spawning migration.....	80	<i>tshawytscha</i> , <i>Oncorhynchus</i>	25, 73, 153
skeletal musculature.....	25-59	Viviparous fish, <i>Gambusia affinis</i>	181-190
<i>majalis</i> , <i>Fundulus</i>	193	Weakfish, correlations of weight and body measurements.....	141-147
		Woods Hole, Sporozoön parasites in vicinity of.....	193-214
