

Supplementary Table 3. Age agreement table for bigeye tuna samples comparing the adjusted annual increment counts (rows) to the true times at liberty (columns) converted to integer months. Numbers in each cell represent the sample size. Grey cells on the bold diagonal line represent unbiased estimates. Grey cells above the bold diagonal line are samples whose estimated times at liberty from the annual increment count underestimate true time at liberty. Grey cells below the bold diagonal line are samples whose estimated times at liberty from the annual increment count overestimate true time at liberty.

Supplementary Table 6. Age agreement table for yellowfin tuna samples comparing the daily increment counts (rows) to the true times at liberty (columns) converted to integer months. Numbers in each cell represent the sample size. Grey cells on the bold diagonal line represent unbiased estimates. Grey cells above the bold diagonal line are samples whose estimated times at liberty from the annual increment count underestimate true time at liberty. Grey cells below the bold diagonal line are samples whose estimated times at liberty from the daily increment count overestimate true time at liberty.
