ABSTRACT

This is a guide to recent literature on pinnipeds and cetaceans.

INTRODUCTION

The following is a list of recent literature on identification, biology, and commercial use of pinnipeds (seals, sea lions, and walrus) and cetaceans (whales and dolphins). Many books and thousands of articles in popular and technical magazines are devoted to marine mammals. The following list emphasizes recent titles; it includes only articles and books in English, or translated to English.
