The printing of this publication has been approved by the Director of the Bureau of the Budget, August 2, 1955. (8/31/57)

CONTENTS

COVER: School days are here again and school lunchrooms represent a growing market for fishery products. Precooked fishery products were introduced to the school-lunch program about two years ago and have steadily increased in popularity. Fish sticks and other precooked fishery products are used regularly by school lunchrooms in the feeding of thousands of school children (see page 73 of this issue).
