CONTENTS

COVER: Fish pier at Fulton Fish Market, New York City, with a medium dragger docked at the entreme left and a large otter trawler in the center of the pier. Although primarily a distribution market for fish and shell-fish landed at other fishing ports, about 8 percent (almost 13 million pounds annually) of all fish and shellfish received in Fulton Fish Market is landed direct by fishing vessels. Leading varieties landed are scup (porgy), sea scallops, fluke, and butterfish.
