## CONTENTS

COVER: The auction hall in the Danish port of Esbjerg located on the west coast of Jutland on the North Sea. A total of 20,031 metric tons of fish, valued at 29,994,000 kroner (US\$4.3 million) ex-vessel, were sold at auction in the hall in 1960. Esbjerg is Denmark's largest fishing port with landings of about 185,000 metric tons of fish in 1961. About 23,600 tons were food fish and the balance fish for industrial purposes (for manufacture into meal and oil), and into food for trout farms and fur-animal farms. The most important species landed were herring, plaice, and mixed industrial fish. On January 1, 1962, a total of 534 fishing cutters of over 5 gross tons were registered out of that port.
