Use of funds for printing this publication has been approved by the Director of the Bureau of the Budget, May 1, 1963.

5/31/68

CONTENTS

COVER: The best way of overcoming the general lack of protein in the diets of the Far Eastern populations is by increasing the production and consumption of fish. The Food and Agriculture Organization of the United Nations sent an expert in fish culture to Thailand to train and assist Thai technicians in improving and developing the fresh fish resources of their country. This photograph shows cast net fishing in the Chao Phya River. This method of fishing, although picturesque, is not efficient by modern standards.
