## CONTENTS

COVER: The M/V Kaho, exploratory fishing and gear research vessel operated on the Great Lakes by the U. S. Bureau of Commercial Fisheries. She is 65 feet long with an 18-foot beam, is powered by twin 150 hp. Diesel engines, and has a cruising speed of 12 knots. Her home port is Saugatuck, Mich. The name of the vessel derives from the Chippewa Indian word for "hunt."

Lake Erie Fisheries Explorations, May-November 1960, by Ira A. Carr

### TRENDS AND DEVELOPMENTS:

- Alaska:
  - .. Pink Salmon Workshop Meets in Juneau
  - .. Foreign Fishing Activity in Bering Sea
  - .. Alaska Fishery Landings, 1963
  - .. Bait Herring Fishing at Ketchikan
  - .. Herring Growth and Mortality Rates Analyzed
- California:
  - .. Shrimp Resources off California Coast Surveyed
  - .. San Francisco Bay Investigations Continued
  - .. Growth and Life History of King Salmon Investigated
  - .. Pelagic Fish Population Survey Continued
  - .. Sea Otter Population Survey
- Chesapeake Bay:
  - .. Research Conference Points Up Problem Areas
- Federal Aid for Sport Fish and Wildlife Restoration:
  - .. Funds Apportioned to States, Fiscal Year 1964
- Federal Purchases of Fishery Products:
  - Department of Defense Purchases, Fourth Quarter 1963:
    - .. October 1963

Created in 1849, the Department of the Interior--a department of conservation--is concerned with the management, conservation, and development of the Nation's water, fish, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States--now and in the future.
