## CONTENTS

COVER: The 114-foot French trawler *La Rafale* (200 gross tons), 1 of the 2 vessels chartered for the Guinean Trawling Survey. Because of the weight of the exceptionally large catch, caught off the Ivory Coast, the cod end was split and lifted in two sections. Small grunter (*Brachydeuterus auritus*) formed about 90 percent of the catch.

- The Guinean Trawling Survey, by Frank Williams  
Changes in Abundance of the Marine Worm, *Glycera Dibranchiata*, Associated with Seawater Temperature Fluctuations, by Robert L. Dow
